

NABIL EL MAAROUI

Fullstack developer
📞 +212-642910898

✉ nabilelmaa@gmail.com

📍 Ifrane, Morocco

SUMMARY

Dedicated senior Computer Science student, graduating this year, with a solid knowledge of full-stack development and software engineering principles. I have successfully contributed to the design, development, and deployment of scalable web and mobile applications. My work focuses on creating efficient, user-friendly applications, and I am currently conducting research on digital solutions to enhance local services, showcasing my commitment to solving real-world problems through technology. Check out my portfolio to see my work in action.

EDUCATION

Bachelor in Computer Science
Al Akhawayn University Ifrane
📅 01/2020 - 12/2024

EXPERIENCE

Fullstack developer Intern
Al Akhawayn University & Province of Ifrane
📅 06/2024 - 08/2024 📍 Ifrane, Morocco

- Led the development of **IfraneX**, a full-stack web application streamlining booking management for Ifrane, a popular tourist city. The app improves user engagement and operational efficiency, featuring an intuitive admin dashboard, SEO optimization, and real-time data access. I worked as a fullstack developer to ensure seamless integration and an enhanced user experience, benefiting both users and local businesses.
- **Tech stack:** React, Next Js, TypeScript, Tailwind CSS, MongoDB with Prisma, Cloudinary, Docker, Vercel.

PROJECTS

Ifranex Mobile App
📅 08/2024 - 09/2024

- For both iOS and Android, complementing an existing full-stack web application. This booking management app enables users to manage bookings, access services, and communicate effectively. Focused on delivering a seamless user experience with real-time data integration.
- **Tech stack:** React Native, MongoDB with Prisma, Express & Node.js, leveraging existing APIs for the **IfraneX** web application.

Car Rental Web App
📅 03/2022 - 04/2022

- Rahioui is a user-friendly platform designed for seamless car booking experiences. Users can browse through a variety of available vehicles, filter by preferences such as type and price, and easily make bookings.
- **Tech stack:** React.js, Next.js, Typescript, TailwindCSS, PostgreSQL, Clerk for authentication, Cloudinary.

E-commerce Web App
📅 01/2023 - 01/2023

- This e-commerce app provides a seamless shopping experience, allowing users to browse, search, and purchase products from a variety of categories. It features a user-friendly interface, secure payment gateways, and personalized recommendations based on user preferences.
- **Tech stack:** React.js, Next.js, Javascript, TailwindCSS, Strapi for the backend.

SKILLS

Frameworks & Libraries
React.js, Next.js, Express.js with Node.js, Spring Boot, TailwindCSS, React Native

Programming Languages
Java, Javascript, Typescript, Python, C

Databases
PostgreSQL, MongoDB with Prisma

Other tools
Git, GitHub, Docker, Vercel, DigitalOcean
